

Release notes for openPEPPOL validation artefacts V3.2.0

Published 11.05.2016

Overview

1. Several validation rules have been optimized according to incoming RFCs
2. The OPENPEPPOL core artifact have been added to the validation to validate that the document instance is conformant to the PEPPOL core elements
3. New rules have been implemented for the Despatch Advice (EUGEN-T16-R007) for validation of delivered quantities
4. Minor editorial corrections has been done in the order BIS, catalogue BIS and Billing.
